A HIGH PERFORMANCE PROFESSIONAL FOR THE SMALL OFFICE

The new multifunction monochrome A4 systems are designed with the needs of small work groups in mind. Five models are available tailored to the different categories of user:

d-Copia 3524MF, reliable with print, copy, scan and fax functions, speeds up to 35 ppm and resolution of 1200 dpi. Compact and silent, perfect also for desk use.

d-Copia 3524MFplus, impressive with integrated Wi-Fi® and 4.3" colour touchscreen.

d-Copia 4023MF (without fax) and **d-Copia 4024MF**, ideal for heavier duty cycles: print speeds up to 40 ppm, faster warm-up and time to first copy, dual scanner and toner capacity up to 7200 pages.

d-Copia 4024MFplus, is the smart MFP which integrates Wi-Fi® and the JaWS platform: thanks to that, complex demands and professional workflows will be satisfied.

EFFICIENCY AND CONFIDENTIALITY

All models are equipped with a powerful 800 MHz controller able to handle different jobs concurrently without penalizing the speed. Scanned files can be stored on USB memory devices or sent to email contacts (scan to e-mail), server folders (scan to FTP) or shared folders on PCs (scan to SMB) so as to respond to company demands for faster processes and reducing unnecessary printing. The number of formats supported is countless. Large quantities of data can be transferred thanks to the high-level data compression function, while PDF encryption assures confidentiality.

PRODUCTIVITY AND ENVIRONMENTAL RESPECT

The touchscreen* operator panel provides intuitive, direct access to functions, while the JaWS** software development platform (memory expansion and SD card are required) allows document flows to be customised, improving productivity and efficiency in the modern office. Reduced energy consumption, particularly in sleep mode, long-life components, eco-compatible parts, reduced packaging, pre-installed toner and the use of recycled materials all contribute towards making these systems real friends of the environment.

SPEED AND QUALITY

The high-resolution of 1200 x 1200 dpi produces images and graphics that are sharp and precise, most advantageous when printing drawings and sketches in small scale.

The dual-scan automatic feeder, single pass, avoids sheet turnover and so reduces the risk of damage. Fewer mechanical movements also mean less mechanical wear over time, allowing also greater flexibility in the types of paper that can be used.

Wi-Fi® AND MOBILE PRINTING

d-Copia 3524MFplus and 4024MFplus are integrated with Wi-Fi® allowing connection to wireless devices via access point, and with Wi-Fi Direct® allowing direct connection with up to three devices simultaneously. For all models, direct (wireless) printing is possible from a mobile device, when both are connected to the local Wi-Fi® network, and directly (when supported by Wi-Fi Direct®) from the Olivetti Mobile Print app, compatible with Android and iOS; for iOS devices also using the AirPrint® protocol
